## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 10, 2006 has been entered.
2. The rejection of claims 1, 5, 13-14, and 18-32 under 35 U.S.C. 103(a) as being unpatentable over Kotera et al, 4,340,519 (Kotera) in view of Puppin 6,346,160B1 has been withdrawn upon further consideration.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 5-7, 13-14, 18-21, 23-27, and 29-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Afzali-Ardakani et al, 5,527,838 (hereinafter Afzali-Ardakani), for reasons of record.

### ***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory

Art Unit: 1774

obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1, 5-8, 13-14, and 18-32 are provisionally rejected on the ground of

nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3, 5-8, 13-14, 18-32, 44, 46-47, and 50 of copending Application No. 09/620,526.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the coated strands of each application are substantially the same and it would have been an obvious variant to the skilled artisan to form the coated fiber strand of the copending application into a fabric as presently claimed.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Response to Arguments***

7. Applicant's arguments filed July 17, 2006 have been fully considered but they are not persuasive.

Applicants argue that Afzali-Ardakani fails to expressly or inherently teach a fabric comprising at least one strand comprising a plurality of fibers and having a resin

Art Unit: 1774

compatible powdered coating composition on at least a portion of a surface of the fabric, the resin compatible powdered coating composition comprising a plurality of discrete particles, at least one lubricious material different from the plurality of discrete particles, and at least on film-forming material, wherein the at least one fiber strand comprises at least one glass fiber.

In response thereto, the examiner's arguments set forth in the February 10, 2006 Office Action on page 2 are incorporated herein.

Applicants argue that the fluorine containing polymer of the prior art is not a lubricious material but is an adhesive, and thus, the rejection is improper.

It is the position of the examiner that fluoropolymers are well known to have lubricious properties. Whether a fluoropolymer is used/added to a composition for reasons other than said lubricous properties, for example high temperature stability, does not preclude the basic characteristics of said fluoropolymer. The language of "lubricious material" is not specific and only requires that said material have lubricious properties.

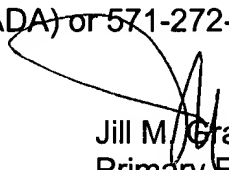

No claims are allowed.
